Assignment 11

07 February 2023   11:58 PM

Ques 1)
What is Padding and margin and when do use them
Answer
Margin-

the margin of an element represents the outside space of the element itself,

Padding-

while the padding represents the inner space surrounding the element.

```
    <style>
        .container {
            border: 2px solid palevioletred;
            padding: 12px 4px 10px 14px;
            margin: 25px 40px;
        }
    </style>

  <div class="container">
        <h3>Good Morning</h3>
    </div>
```

Ques 2)
What is display property and explain inline ,block and inline-block element ?
Answer
Inline - in display:inline like span. The height and width properties are not affected inline it allows only left and right side margin. Not top and bottom.
Inline-block- the element is formatted as inline element but it can apply height and width values.
Block elment- the element generates a block element box generating line breaks before and after the elements.

Ques 3)
Explain min-height, max-width,max-height and max-width in CSS?
Answer

Min-height: property defines the minimum height of an element. The content is smaller than the minimum height will be applied.
Min-width: property defines the minimum width of an element.. The content is smaller than the minimumWidth will be applied.
Max-height:
The max-height property defines the maximum height of an element.
If the content is smaller than the maximum height, the max-height property has no effect.

Max-width:
The max-width property defines the maximum width of an element.
If the content is smaller than the maximum width, the max-width property has no effect.
